PROFESSIONAL SUMMARY

Full Stack JavaScript Developer and CS graduate who builds and ships production web apps: currently delivering a live e-commerce store for a client as a freelancer, after an internship building features for a live CRM platform. Author of a published open-source Node.js library on npm. Strong foundations in data structures, algorithms and OOP, with practical skills in React.js, Next.js, Node.js, Express.js, MongoDB and TypeScript.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js (Hooks, Context API, React Router), Next.js (SSR, SSG, App Router, API Routes), Redux Toolkit, Tailwind CSS, Material UI, Vite, Responsive Design

Backend: Node.js, Express.js, RESTful API Design, MVC Architecture, Middleware, JWT Authentication, bcrypt, Rate Limiting, CORS, Helmet

Databases: MongoDB, Mongoose, SQLite (Turso), Schema Design, Data Modeling

CS Fundamentals: Data Structures, Algorithms, OOP, Operating Systems; also familiar with C#, Python, C++

Testing & Tools: Jest, Supertest, Unit & Integration Testing, Load Testing, Postman, Git, GitHub, GitHub Actions, CI/CD, Vercel, npm

Practices: Agile, Scrum, Code Review, Performance Audits, Technical Documentation, Debugging

WORK EXPERIENCE

Freelance Full Stack Developer | Skrps | *Oct 2026 - Present* | Live

E-commerce store for medical scrubs in Egypt. Next.js, SQLite (Turso), Vercel.

- Built the storefront end to end: catalog, cart, guest checkout, and order tracking by order number and phone
- Built an admin dashboard for a non-technical owner to manage orders, products, stock, categories, shipping fees and staff
- Integrated cash on delivery and InstaPay payments with per-governorate delivery fees
- Owned performance and code quality: reviewed and merged all pull requests, ran security review, load testing and frontend/backend audits

Full Stack Developer (Internship) | DigiCrafterz | *May 2024 - Dec 2024*

Sendifier CRM Platform, MERN stack. 6-month internship, extended by the company.

- Built the Departments module from scratch and the Tasks feature integrated with employee calendars, from database schema to React UI
- Designed and optimized RESTful API endpoints in Node.js and Express.js for the Departments, Tasks and Calendar features
- Collaborated in a cross-functional Agile team: code reviews, Git branching workflows, iterative delivery

PROJECTS

Job Catcher | AI-Powered Job Collection Pipeline | Live

Node.js, LLM APIs, Telegram API, GitHub Actions, MongoDB Atlas, Next.js, Vercel

- Scheduled pipeline that reads dozens of Telegram job channels, filters and deduplicates posts, and uses LLM APIs to extract details and score job fit, publishing results to a live web board

@osamaibrahim/rate-limiter | Open-source Node.js library on npm | npm

TypeScript, Node.js, Vitest, tsup, ESM/CommonJS

- Framework-agnostic rate limiter with zero runtime dependencies: sliding-window and token-bucket algorithms, pluggable stores, Express middleware

Nook | Full-Stack E-commerce Store

React, TypeScript, Redux Toolkit, Node.js, Express.js, MongoDB, Stripe

- Cart, checkout, order history and admin dashboard, with JWT access and refresh tokens (httpOnly cookie) and role-based admin routes

Smart Education Blockchain | Graduation Project

TypeScript, React, Next.js, Node.js, MongoDB, Solidity, Web3.js, IPFS

- Full-stack DApp for issuing and verifying tamper-proof academic certificates on an Ethereum testnet

Other Projects: ATHR (multi-branch POS) | Network of Trust | Blood Donation Platform | B2B SaaS Landing Page

EDUCATION

B.Sc. Computer Science | Menoufia University | Sep 2020 - Jul 2025

LANGUAGES

Arabic (Native) | English (Professional Working Proficiency)
